Nurturing English Proficiency

As visionary Educationists, we are aware of Non-English culture prevalent in the society proving to be hindrance in nurturing the proficiency of English.

At Eklavya Global School, we are very much focused to blossom the language among children from the grass root itself. For this, the school has adopted various methods.

Students are tested at intervals by the Cambridge English Language assessment programme which has evidently brought in remarkable improvement in the Spoken & Written English Language.

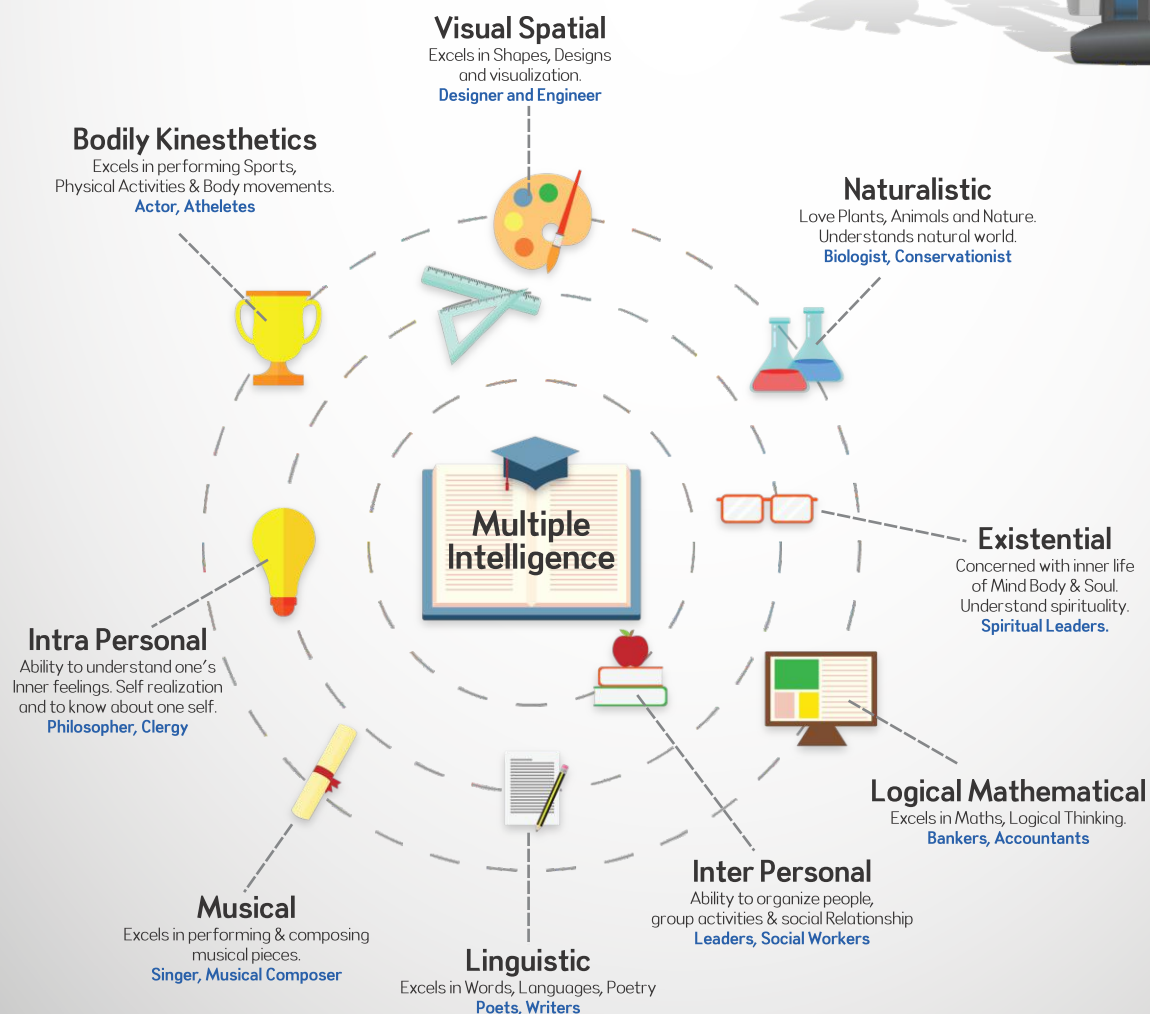

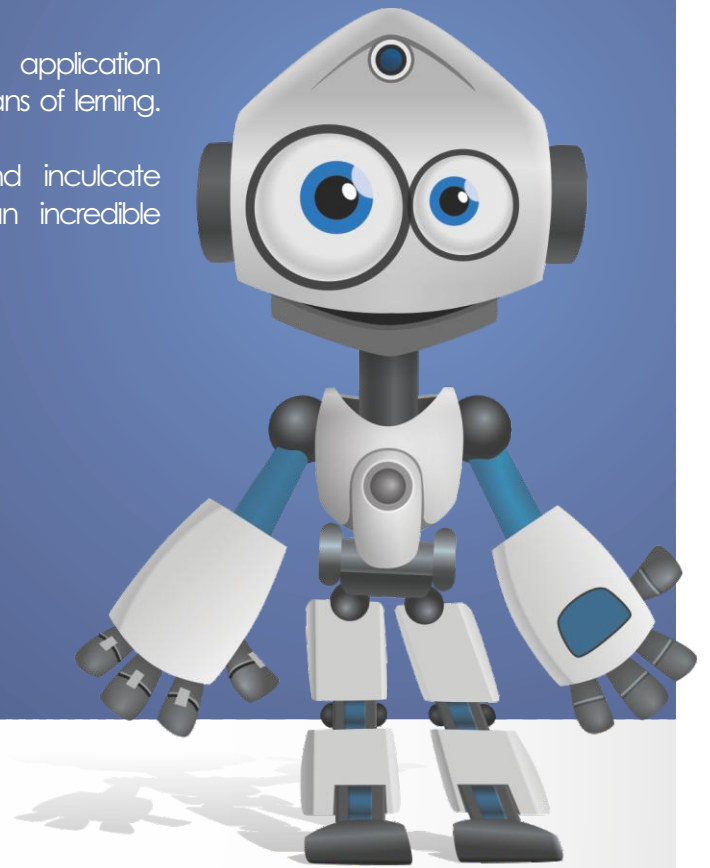

The Cambridge English Language Assessment is an integral part of our curriculum which is taken by over 2 million candidates in 140 countries and is recognized and trusted by the universities, employers and government organizations around the world, making our students visible across the GLOBE.

Practical Implementation of Learning

We at EKLAVYA GLOBAL SCHOOL believe that practical application of attained knowledge is far important than any other means of learning.

For giving the practical exposure to the students and inculcate scientific temper among them, we have designed an incredible **ROBOTICS LAB** besides science labs.

Beyond Curriculum

Eklavya Global School offers a wide range of programs of extra-curricular activities including arts and sports for a child to participate in the school. The entire school is divided into 4 houses to promote leadership qualities, healthy competition, values like caring & sharing, positive attitude towards success and failures, cooperation with peers, respecting others' decision and sportsmanship among the students, to compete with themselves; to foster spirit of unity, to explore the unreachable, to identify one's potential, to inculcate integrity and self discipline and eventually to achieve 360° development. We made it possible through forming FOUR HOUSES.

Indian Traditional Games

Indian Traditional Games were not just games; they were designed in such a way that one can develop lot of skills like logical thinking, building strategy, concentration, basic mathematics, aiming, and lots more. Traditional Games act as learning aids. They teach us many things while playing like to learn, to win and lose, develop sensory skills, count, add, improve motor skills, identify color, improve hand-eye co-ordination and finally to have fun.
